REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a process for the catalytic generation of hydrogen by the self-sustaining combination of partial oxidation and steam-reforming of a hydrocarbon comprising contacting a mixture of the hydrocarbon and an oxygen-containing gas and steam with a catalyst comprising rhodium dispersed on a refractory oxide support material which comprises as cations cerium and zirconium, wherein the weight ratio of cerium to zirconium in the support material is from 50:50 to 99.5:0.5.

The prior art, such as Rudy U.S. Patent 5,531,972, discloses a catalyst on a support material wherein the amount of ceria impregnated into the zirconia used is limited to not more than about 15 percent by weight, preferably not more than about 10 percent by weight ceria, expressed as the combined weight of the ceria and zirconia. By thus controlling the amount of ceria dispersed on the zirconia, it has been found that the adverse reaction between rhodium and ceria does not occur to any significant extent. See col. 6, lines 38-44. Not only does Rudy fail to explicitly teach a weight ratio of cerium to zirconium from 50:50 to 99.5:0.5, but the above teaching of Rudy would not motivate one of ordinary skill in the art to increase the cerium content to above 15 percent by weight, let alone to 50 percent. Therefore, the instant claims are patentably distinct from Rudy.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
